PROFILE

Detail-oriented aspiring Web Developer with a strong foundation in IT and a genuine passion for user interface design. Proven ability to architect web application concepts visually using Canva and bring them to life through AI-collaborative "vibe coding" across the full stack. Highly motivated to bridge the gap between creative frontend design and core backend programming through rigorous continuous learning and project execution.

EDUCATION

Mar 2018 - Mar 2019
Ahmedabad

Secondary School Certificate (Class X) | GSEB

P.M. Primary School

Percentile Rank : **85.79%** | Grade: **B2**

- Completed secondary education with a strong foundational focus on Mathematics, Science, and Computer Education. Achieved an overall **85.79 percentile rank**, demonstrating consistent academic performance across all core subjects.

May 2020 - May 2021
Ahmedabad

Higher Secondary School Certificate (Class XII) | GSEB

Nagindas Maganlal High School

Percentile Rank : **89.24%** | Grade: **B1**

- Graduated from the General Stream with a curriculum focused on quantitative and analytical subjects including Statistics, Accountancy, and Computer Studies. Secured a **B1 overall grade** with a **89.24 percentile rank**, scoring **543/750 marks**.

Jun 2021 - June 2022
Ahmedabad

Bachelor of Commerce (First year)

Aroma College of Commerce, Gujarat University

- Successfully completed the foundational first year of commerce with a **90%+ academic score** before strategically pivoting to Information Technology to pursue a dedicated career in web development.

Jun 2022 - Jun 2026
Ahmedabad

Integrated Master of Science in Information Technology (I.M.Sc. IT)

Silver Oak College of Computer Application, Silver Oak University

- Earned a dual Bachelor's and Master's credential specializing in modern web design paradigms, script programming, and system deployment. Successfully engineered multiple web-based projects and a final dissertation, demonstrating consistent academic excellence with a perfect 10.00 SPI in advanced development tracks.

May 2025 - Present
Ahmedabad

Full Stack Web Development Course

Red and White Skill Education

- Intensive full-stack specialization course emphasizing practical web engineering. Proficient in delivering complete web applications from front to back, leveraging HTML, CSS, JavaScript, React, Node.js, and MongoDB. Actively advancing backend capabilities through ongoing modules in structural programming and PHP scripting.

PROJECTS

User Management & Registry Web Application

React, Express.js, MongoDB, REST API, JavaScript

- Developed a full-stack, decoupled web application utilizing a Vite-React 19 frontend and an Express.js backend to manage high-performance user registries.
- Implemented secure cryptographic authentication and configured CORS-enabled REST APIs to handle seamless, secure cross-origin data communication.
- Optimized client-side rendering by engineering a sleek, reactive state-driven registry panel, ensuring real-time UI updates and data synchronization.

Cloth Store - E Commerce Platform

React, React Router, Axios, Local Storage, CSS

- Architected a full-scale, responsive e-commerce web application for clothing retail, incorporating dynamic client-side routing and optimized state management.
- Engineered a complex cart system and checkout logic, utilizing persistent browser storage to maintain user session data and prevent cart abandonment.
- Integrated dynamic third-party API communication using Axios to handle asynchronous data fetching, product filtering, and seamless pagination.

Shark Tank Startup Pitch Tracker

Vanilla JavaScript, REST API, CRUD, Skeleton CSS

- Built a dynamic, data-driven REST API CRUD application from scratch using vanilla JavaScript to successfully handle, manage, and track startup pitch submissions.
- Programmed custom frontend search algorithms to allow users to instantly sort, filter, and search through large datasets of startup pitches in real-time.
- Manipulated standard DOM nodes directly and styled the application with Skeleton CSS to deliver a lightweight, lightning-fast user experience with zero framework overhead.

Amazon Prime Video UI Clone

Advanced HTML5, CSS3 (Glassmorphism, Flexbox, Grid)

- Created a high-fidelity pixel-perfect replication of the Amazon Prime Video streaming platform interface to demonstrate advanced modern frontend styling capabilities.
- Authored a highly sophisticated responsive UI layout featuring a glassmorphic fixed navigation bar, custom multi-tier dropdown menus, and box-shadow overlays.
- Enhanced user interaction metrics by designing hardware-accelerated, directional hover-scale animations for the platform's extensive movie gallery grid.
